iCloud Sync
Built-in screenshot and screen recording tools (Shift + Cmd + 5)

MacBook Air 2020

11 July, 2025

BAD

Downloading certain apps is more complex than it needs to be

245.11 GB data out of which 148 GB is system data

Limited Android support

Only has a C Type port, lack of USB-A or HDMI

RAM is not upgradable, soldered SSD

Poor for testing GPU-heavy apps or mobile games

Managing folders in Finder is more tedious than it is in Windows

Apple repairs are extremely costly

MacOS security makes it harder to fully uninstall apps, with le

CAN BE ADDED

More ports besides C type

Receive files from Android or Windows devices via Wi-Fi Direct

Swappable SSD/RAM

Touchscreen support

Built-in Android emulator like iOS Simulator (no setup)

Foldable body or screen

Delete button

Direct plug-and-play file transfer support like Windows

App uninstaller (removes leftover system files too)

Module Name:	Groq login
Test Case ID:	Id001
Tester Name:	Ashish
Test Case Description:	To Check Login functionality with valid credential
Prerequisites:	1.Stable internet connection 2. Cross browser support3
Environment Information:	WindowsOS,Macbook,AndroidOS
